

Authentic passion for anything driven by an engine on land, sea or air.

Aerospace academic background with test engineering expertise.

Entrepreneurial mindset, always up for the next big challenge.

I am 39 years old and I hold a PhD in Engineering from Cranfield

University and a Master degree in Aeronautical Engineering from

the University of Rome, La Sapienza. I began my career in the

academia, focusing my research interests on aircraft propulsion

before joining BETA CAE Systems in 2011. Soon after I set up in

Turin the first representative office of the company outside Greece.

I staffed and run it as a Regional Manager of BETA CAE Systems

SA, in charge of all Italian activities and the business development

in the national market.

The positive results achieved by the representative office have

encouraged the incorporation of a new independent subsidiary

under the name of [BETA CAE Italy Srl](#), of which I am now Vice

President and Managing Director.
